	<p>Temperature measuring Monitor temperature all day, automatically test three times per day (morning/midday/evening). Automatic alarm system triggered if temperature higher than 37.3°C.</p>
	<p>Time/Date Time and date displayed</p>
	<p>Vibrate alarm Two groups alarms</p>
	<p>Timer Timer equipped</p>
	<p>Rechargeable polymer lithium battery USB set, low-power reminder and mobile power charger supported</p>

Monitor temperature all day, automatically test three times per day
(morning/midday/evening). Automatic alarm system triggered if temperature higher than 37.3°C.
And light up the corresponding green or yellow or red indicator light

Green indicator light when body temperature < 37.3 °C Bright yellow indicator when body temperature > 37.3 °C Bright red indicator when body temperature > 38.8 °C

Vibrate alarm: Two groups alarms
Vibration reminder does not affect others

More accurate temperature measurement experience
Measurement accuracy: ±0.1°C (test under armpit)

Temperature Smart Watch

Effect Of Ultraviolet Rays

Ultraviolet rays destroy the DNA and RNA of microorganisms, causing them to lose their reproductive ability and thus die, thus achieving the effect of killing bacteria.

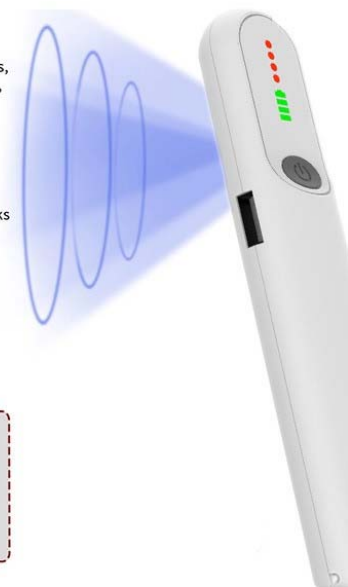

(Before irradiation)

(After irradiation)

DNA strand breaks

The sterilization rate is as high as 99.9%

why not use mercury lamp irradiation sterilization?
it will be poisoned once a mercury leak occurs

Unique safety design can prevent the accidental injury of children by ultraviolet light
